Unichem Pharmaceuticals Launches Generic Lioresal® – Baclofen Tablets

Unichem Pharmaceuticals (USA), Inc. is pleased to announce the launch of Baclofen Tablets, USP to our growing portfolio.

Baclofen Tablets, USP is the generic version of Lioresal® from Novartis Pharmaceuticals Corporation. It is a muscle relaxant and antispastic. Its chemical name is 4-amino-3-(4-chlorophenyl)- butanoic acid. Baclofen tablets are useful for the alleviation of signs and symptoms of spasticity resulting from multiple sclerosis, particularly for the relief of flexor spasms and concomitant pain, clonus, and muscular rigidity. Patients should have reversible spasticity so that baclofen tablets treatment will aid in restoring residual function. Baclofen tablets may also be of some value in patients with spinal cord injuries and other spinal cord diseases. IQVIA recorded sales of \$106M and 829M tablets of Baclofen during the last 12 months ending May 2020. Baclofen Tablets, USP is available in 10mg & 20mg – 100ct & 1000ct bottles for oral administration.

President and Chief Executive Officer, Scott Delaney, an accomplished leader with over 27 years of experience in brand and generic pharmaceuticals management, said the following, regarding the launch of Baclofen.

“We continue to focus our collective efforts on the launch of new and innovative products into the generic pharmaceutical industry. Baclofen provides another example of Unichem’s unwavering commitment to delivering lower cost options here in America. Our focus on service, innovation and reliability helps us compete successfully in this high-volume, low cost marketplace and allows us to expand our product offerings in the US market every year so that we can better serve our patients.”
